📁 PROJECTS

Recruitment Management System

(Using Web Development)

use technologies - HTML, CSS, JavaScript, PHP, MySQL, Bootstrap.

This Recruitment Management System provides an online platform for job seekers to find their new career by browsing the job vacancies in a certain company and sending an application using the site. It also helps the certain company recruitment processes to be more efficient and effective in which they can simply store, retrieve, and manage their applicant data.

Edge Detection In Computer Vision

(Using Python)

Read the image and convert it to grayscale format. Apply binary thresholding Find the Contours. Removing background from an image using OpenCv Edge detect
